

- Evaporator is made by advanced laser welding processing technology, solid and durable;
- Speedy ice doffing process. No extra heat needed, by using hot freon gas itself produced it melts the ice to fall. The whole process only takes 120 seconds;
- Unique water circulating system. After ice is doffed, the un-frozen water collected in the low water tank will be recycled to make ice. It is energy sufficient design but increase the ice production;
- SUS304 or aluminum alloy evaporator plates complies to hygiene requirement;
- Ice forming time can be controlled to adjust the thickness of ice;
- Plates quantities can be modified to suit your various ice demand.
